Your student is experiencing symptoms (fever, chills, cough, shortness of breath, fatigue, muscle/body aches, headache, new loss of taste or smell, sore throat, congestion/runny nose, or nausea, vomiting, or diarrhea:

1. Keep them home until cleared by the school.
2. Email Attendance and the school nurse (jpeckham@thefsi.us) to alert them of your student’s illness.
3. Is your student vaccinated?

YES
Provide proof of vaccination to the school. Schedule a rapid test on campus or an outside facility and provide the school nurse with documentation. An alternate diagnosis from a healthcare provider is also sufficient. They may return when 24 hours symptom-free.

NO
Has your student had COVID within the past 90 days?

YES
Schedule a rapid test on campus or an outside facility and provide the school nurse with documentation. An alternate diagnosis from a healthcare provider is also sufficient. They may return when 24 hours symptom-free.

NO
Has there been any known exposure to COVID-19?

YES
Reach out to school nurse for next steps. A PCR test and/or quarantine will be needed. Please be ready to provide date of last contact with the COVID positive individual.

NO
Schedule a rapid test on campus or an outside facility and provide the school nurse with documentation. An alternate diagnosis from a healthcare provider is also sufficient. They may return when 24 hours symptom-free.
Other information to note:

- Rapid antigen testing is available on campus between 8 and 10 am every day of the week. We are working on an appointment scheduling option.

- Rapid antigen testing is available on campus if a student has experienced symptoms for at least 24 hours. If not at this time frame, an appointment can be made for the next day.

- We are not screening students this year; if you have been called to pick up your student from school, it is because your student has come forward and reported symptoms. We must act on this accordingly to follow policy.

- If you believe symptoms are related to another issue (anxiety, issues at home) or related to chronic issues (asthma, seasonal allergies), please email jpeckham@thefsi.us to discuss further. However, testing may still be warranted.
